NEW JERSEY PAIN CONSULTANTS

310 Madison Avenue, Suite 301, Morristown, NJ 07960 • Other offices: Maywood • Mountainside • Ridgewood
973-998-9200 • njpainconsultants.com

“With our aging yet active population, more people are experiencing chronic pain,” says Dr. Michael Rudman. Drawing on over two decades of research and experience, he and Dr. Richard Winne offer interdisciplinary treatment for acute and chronic pain, often caused by spinal conditions and/or complex regional pain syndrome (RSD). They perform comprehensive evaluations factoring in their patients’ physical, functional, emotional and psychological needs. Both doctors are board certified in anesthesiology and pain management, fellowship trained and multiyear *New Jersey Monthly* Top Doctors. Dr. Rudman is medical director of Morristown Medical Center’s pain management division.

“Primary care doctors know that we practice solid, sound medicine here,” Dr. Winne says. “They rely on us to relieve their patients’ pain safely and to monitor them closely.” Patients appreciate their willingness to truly listen and try any strategy—behavioral, pharmacologic or interventional—to achieve optimal outcomes. Drs. Rudman and Winne use radiofrequency ablation, steroidal injections, spinal cord stimulation and other current technologies.

This well-managed office offers timely appointments plus a compassionate staff to greet patients, who often arrive hurting and frustrated from not finding a doctor to help. “When someone who has suffered from debilitating pain can resume a functional, productive lifestyle, that’s immensely satisfying,” Dr. Rudman says.

HOSPITAL AFFILIATIONS: Morristown Medical Center; Franklin Surgical Center, Basking Ridge.
